Long Beach, CA

Online Full Stack Java Web Development Apprenticeship

September 2019 – June 2020

- Graduate of the 720-hour web development asynchronous online bootcamp. Major projects completed include:
 - **Virtual vending machine.** Developed an application to model processes of a vending machine. An interactive web-based UI allowed a user to “insert” money and select an item from the menu displayed. Technologies used: HTML, CSS, Bootstrap, JSPs using EL and JSTL, servlets, Java, Spring MVC.
 - **Hotel reservation database.** Designed a database that would allow a hotel to track and manage room reservations, customer and guest information, promotions, rooms and other chargeable items, and invoices. Technologies used: MySQL database, MySQL Workbench, SQL, MS Excel.
 - **Superhero Sightings reporting system.** Developed a web-based CRUD application to catalogue various details about fictional superheroes and Earth-based locations they have frequented. Technologies used: MySQL, HTML, CSS, JSPs using EL and JSTL, servlets, Java, Spring MVC, TDD using JUnit.
 - **Content Management system.** Developed full stack, web-based content management system, where site owner could write blog posts, setup and manage other users, and create static page content. Technologies used: MySQL, Java, JSPs, TinyMCE, Spring MVC, Spring DI, Spring Security, Tomcat, TDD.

Hybrid Apparel
